

CNC Electric Tapping Machine

Machine Features

- Fast and Easy Operation.
- 100% Gauge assurance.
- Eliminates Tap breakage.
- Depth control facility.
- Tapping cost per hole negligible
- Tapped hole counting facility.
- Torque adjustment

Machine Specification

Make & Model	: Tap Smart 245 U
Automation Grade	: Automatic
Max Hole Diameter	: 50 – 100 mm
Voltage (V)	: up to 440
Phase	: Single
Speed	: 0-2000 RPM
Electric Motor	: 0.75 Kw
Work Range Max	: 2200
Work Range Min	: 300

Tap Smart is Flexible arm CNC servo electric tapping machine. Tap Smart's Flexible arm ensure easy hole location and take centre of hole automatically, providing 100% GO-NOGO gauge assurance and perpendicularity.

Tap Smart equipped with built-in control panel with touch-screen provide facility to select tap size/pitch /depth and speed to operator and ensure convenient and fast operation.

The offered Flex Arm Tapping Machine is manufactured from superior quality components with the help of latest technology. These find their wide application in various engineering industries like Rolling Mill manufacturer, Power Press Manufacturer, Paper Mill Manufacturer, Automobile Parts Manufacturer, Extruder Manufacturer and many more.
